Professional Summary

Backend Software Engineer with 4+ years of experience building event-driven, multi-tenant systems with Node.js, NestJS, and TypeScript. Works with PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ, and AWS (SES, SQS, SNS, S3, Lambda). Delivered order management APIs for a platform handling 1,000+ orders per day and shipping workflow automation that reduced manual effort by approximately 20 hours per week. Experienced in REST API design, asynchronous processing, third-party integrations, database optimization, and production support.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), C++
Backend: Node.js, NestJS, Express.js, REST APIs, API Design, Modular Architecture, Multi-Tenant Architecture, Webhooks, Third-Party API Integrations, Swagger/OpenAPI
Databases and ORMs: PostgreSQL, MySQL, MongoDB, Redis, TypeORM, Prisma, Mongoose, Indexing, Query Optimization, Aggregation Pipelines, Caching
Messaging and Architecture: RabbitMQ, AWS SQS, AWS SNS, BullMQ, Redis Streams, Event-Driven Architecture, Asynchronous Processing, Background Workers
Cloud and DevOps: AWS SES, AWS S3, AWS Lambda, AWS EC2, Docker, Nginx, Linux, GitHub Actions, Jenkins, CI/CD, Git
Security and Real-Time: JWT, OAuth, RBAC, WebSockets, Server-Sent Events (SSE)
Integrations: WhatsApp API, Email APIs, Shipping APIs
Frontend: React.js, Next.js, Zustand, Tailwind CSS, HTML5, CSS3
Engineering Practices: Production Debugging, Performance Optimization, Monitoring, Root-Cause Analysis, Code Reviews, Agile

Professional Experience

Khan Global Studies **Mar 2024 – Present**
Full Stack Developer (Backend-Focused) | Noida, India

- Designed modular NestJS/TypeScript REST APIs for multi-tenant platforms, with request validation, structured error handling, and Swagger/OpenAPI documentation that supported frontend integration.
- Implemented JWT, OAuth, and RBAC authentication and authorization to enforce role-based access control across tenants.
- Built event-driven workflows with RabbitMQ, Redis, and BullMQ for background job processing, real-time activity tracking, and decoupled service communication.
- Built asynchronous email-processing pipelines on AWS SES, S3, SQS, SNS, and Lambda for inbound email ingestion, processing, and delivery-status updates.
- Optimized PostgreSQL and MongoDB data models, queries, and aggregation pipelines using TypeORM, Prisma, and Mongoose.
- Integrated Shiprocket, RapidShip, and NimbusPost APIs to automate shipment creation, tracking, and order-status updates.
- Containerized services with Docker, configured Nginx, maintained CI/CD workflows, and resolved production issues through logging, monitoring, and root-cause analysis.

Jellyfish Technologies **Jul 2022 – Mar 2024**
Software Engineer | Noida, India

- Developed and maintained backend APIs and application workflows that supported business requirements and frontend integrations.
- Owned features from requirements analysis through implementation, testing, and production delivery.
- Diagnosed application defects through root-cause analysis and implemented fixes to improve reliability.
- Collaborated with Product, UI/UX, and QA teams, and took part in code reviews and Agile ceremonies to maintain code quality and readability.

Projects

TravelDesk – Multi-Tenant Travel Management and Email Automation oasis.traveldeskcrm.com
Technologies: Node.js, NestJS, TypeScript, MySQL, RabbitMQ, AWS SQS, SES, SNS, S3, Lambda, Docker

- Built backend workflows for a multi-tenant travel CRM covering email ticketing, customer queries, agent workflows, bookings, proforma invoices, and itineraries.
- Designed asynchronous email-processing pipelines with AWS SQS and RabbitMQ to decouple message ingestion, processing, and downstream event handling.
- Processed SES delivery, bounce, and complaint events through SNS and handled inbound email using S3 and Lambda.
- Implemented ticket and agent activity tracking to maintain histories of customer interactions and email events.
- Developed topic-based email subscription and unsubscribe workflows that respect customer preferences.

BotSphere – Multi-Tenant Chatbot and Live Chat Platform campaign.kgs.live

Technologies: Node.js, NestJS, TypeScript, React.js, MongoDB, RabbitMQ, Redis, BullMQ, WebSockets, SSE

- Developed backend services for a configurable chatbot platform with conditional conversation flows and embeddable website chat widgets.
- Implemented rule-based query handling that resolved approximately 35% of common inquiries without human intervention.
- Built agent assignment and conversation routing based on agent workload and inactivity.
- Implemented real-time chat, escalation workflows, and activity tracking using WebSockets, SSE, RabbitMQ, Redis, and BullMQ.
- Integrated WhatsApp APIs with webhook-based template approval and message-status handling, supporting campaigns to 1,000+ users.

KGS Store – E-commerce and Order Management Platform store.khanglobalstudies.com

Technologies: Node.js, NestJS, TypeScript, React.js, MySQL, Redis, REST APIs

- Developed order-management REST APIs for an e-commerce platform handling 1,000+ orders per day.
- Integrated Shiprocket, RapidShip, and NimbusPost APIs for shipment creation, tracking, and automated order-status updates.
- Automated shipping and order-processing workflows, reducing manual effort by approximately 20 hours per week.
- Optimized APIs and database queries and implemented Redis caching to improve application responsiveness.

Education

Master of Computer Applications (MCA) **2020 – 2022**
Jamia Millia Islamia CGPA: 9.6/10

Bachelor of Science (B.Sc.), Mathematics **2017 – 2020**
Chhatrapati Shahu Ji Maharaj University
