Aman Shah Ahamed

Full Stack Developer (Backend-Focused)

Noida, Uttar Pradesh, India | +91-6387959740 | moaslam826@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Backend Software Engineer with 4+ years of experience building production-grade applications using Node.js, NestJS, and TypeScript across e-commerce, CRM, and business-automation domains. Experienced in event-driven, multi-tenant architectures using PostgreSQL, MongoDB, Redis, RabbitMQ, and AWS. Designed and developed a custom enterprise email ticketing platform that replaced Zoho-based workflows, automating email processing and background tasks.

Technical Skills

Languages	TypeScript, JavaScript (ES6+)
Backend	Node.js, NestJS, Express.js, REST APIs, Multi-Tenant Architecture, Swagger/OpenAPI
Databases	PostgreSQL, MySQL, MongoDB, Redis, TypeORM, Mongoose, Indexing, Query Optimization
Messaging	RabbitMQ, AWS SQS, AWS SNS, BullMQ, Redis Streams
Cloud & DevOps	AWS SES, S3, Lambda, Docker, Nginx, Linux, Git, CI/CD, GitHub Actions
Security	JWT, OAuth, RBAC, WebSockets, Server-Sent Events (SSE)
Frontend	React.js,Next.js Tailwind CSS, HTML5, CSS3
Practices	Production Debugging, Performance Optimization, Root-Cause Analysis, Code Reviews, Agile

Professional Experience

Khan Global Studies **Mar 2024 – Present**

Full Stack Developer (Backend-Focused) | Noida, India

- Automated end-to-end order processing and shipment-status synchronization by integrating RapidShyp, NimbusPost, and Shiprocket APIs, eliminating approximately 27 hours of manual work per week across 200 daily orders.
- Built internal EdTech tools adopted by 500 users, streamlining business workflows and internal operations.
- Migrated legacy backend modules to NestJS, reducing p95 API latency from 120ms to 80ms and page load time by 20% while improving code maintainability.
- Mentored junior developers, conducted code reviews, contributed to architectural decisions, and coordinated development across multiple teams.

Jellyfish Technologies **Jul 2022 – Mar 2024**

Software Engineer | Noida, India

- Built and maintained backend APIs and application workflows using Node.js, NestJS, and PostgreSQL, supporting business requirements and frontend/third-party integrations.
- Owned 10+ features end-to-end, from requirements analysis and implementation to testing and production delivery, including recurring-ticket automation that reduced manual effort for support agents.
- Collaborated with Product, UI/UX, and QA teams in Agile sprints, contributed to code reviews, and helped deliver 12 releases on schedule.

Projects

TravelDesk – Multi-Tenant Travel Management and Email Automation oasis.traveldeskcrm.com

Technologies: Node.js, NestJS, TypeScript, MySQL, RabbitMQ, AWS SQS, SES, SNS, S3, Lambda, Docker, Microservices

- Solely architected, developed, and managed the backend of a multi-tenant travel CRM covering email ticketing, bookings, proforma invoices, and itineraries, serving 100+ users across multiple tenants.
- Designed asynchronous email-processing pipelines using AWS SQS and RabbitMQ to decouple message ingestion, processing, and downstream event handling, improving throughput and fault isolation.
- Implemented inbound email processing using AWS SES, S3, and Lambda, with SNS-based delivery, bounce, and complaint event handling, enabling deliverability tracking for 1,000+ emails daily.
- Owned end-to-end cloud infrastructure, deployment, production maintenance, and cost optimization, managing AWS and application infrastructure for reliability and operational efficiency.
- Developed ticket and agent activity tracking alongside topic-based email subscription and unsubscribe workflows, maintaining interaction histories and enforcing customer communication preferences.

BotSphere – Multi-Tenant Chatbot and Live Chat Platform campaign.kgs.live

Technologies: Node.js, NestJS, TypeScript, Next.js, MongoDB, RabbitMQ, Redis, BullMQ, WebSockets, SSE

- Developed backend services for a configurable multi-tenant chatbot platform with conditional conversation flows and embeddable website chat widgets, deployed across 3 websites and a mobile app reaching 1M+ users.
- Implemented rule-based handling for common support queries (FAQs, order status), auto-resolving 35% of inquiries without human intervention.
- Built skill-based query routing that matched each conversation to a domain-specialized agent, then to the least-loaded active agent, with inactivity-based reassignment to balance workload.
- Built a WhatsApp campaign platform on the WhatsApp Cloud API with webhook-based template approval, CSV import with tagging/filtering/segmentation, message-status tracking, and an admin dashboard giving teams agent-level visibility into campaigns to 1,000+ users.

Education

Master of Computer Applications (MCA) **2020 – 2022**
Jamia Millia Islamia New Delhi CGPA: 9.6/10

Bachelor of Science (B.Sc.), Mathematics **2017 – 2020**
Chhatrapati Shahu Ji Maharaj University
